Dear Mario,

Many thanks for your most interesting letter of December 10th.

But first a remark on your remark that my letter to the Humboldt Stiftung 'will help'.

This, I am afraid, is not my experience. You have no idea how many recommendations I have been writing in my life. But I do not think that more than one percent. of the candidates I have strongly supported were successful. (Think of Canberra.) I may perhaps mention in this connection that I have just been offered a knighthood^{*)}! Perhaps this may raise in future the effectiveness of my recommendations from 1% to 1.001%; at least I hope so!

I was very interested in your remarks on space-time problems. It seems to me that you are right in what you say on all counts.

Since you mention 'my friend Friedmann': some people are saying about me that I was in favour of Goldwater!! I should be reluctant to spread such a report even about Friedmann - though I read it in a newspaper, it may be no more true than what they say about me.

What you say about Betroun looks sounds very good.

Please let me know about your plans.

Love to you both

Karl e Heunice

*As I have accepted, I shall be a 'Sir' in a few months.
