April 18th 1967

My dear Mario,

Many thanks for your letters of April 11, 13, and for the page proofs! (of pages 33 to 44.)

(1) As to the page proofs, it seems that the Printers sent you mine, and me yours, mixing up the envelopes; for today I received from them an envelope with pp 97 to 117, containing Prof. Ludwig's and your contributions. I am sending them to you at once.

You will have seen, from the Photocopy of pp. 33 to 44 which I sent you meanwhile, that I corrected them, photocopied them, and sent them off to Heidelberg and Montreal, all on the same day I received them! Thus please cease your insinuating references to my poor Postscript!!! ("Sorry to mention this ^{sore} point but I won't let go so easily." I can say so as well as you!)

(2) About University Administrators I concur with you very much indeed.

(3) I personally should not advise you to accept Berlin: if you don't get your Institute in Montreal, it will have to be in the U.S.; and it will make this plan more difficult if you move too much about: they won't give you easily an Institute if they fear that you won't stay - that you move about without sufficient reason! And although I sympathize with your love for Europe, your ancestors did well to leave Germany.

(4) Love to Marta: she need not hurry in writing to me about Category Theory: though I should like to know what it is all about - the problem - I am simply frightfully busy (this is why I rushed the proofs: it was now or never!), and I won't die of boredom if I hear of it a little later.

(5) Scientific Research: it looks wonderful, but I won't be able to read it properly for some time. Please accept this as not an apology, but as truth! (I am working to 3 a.m.)

(6) I read of course your Turn of the Tide, and liked it. I suppose you won't like to add anything; but in view of your mentioning of Cassirer, would you not put the dates of Heywood, Cassirer, and Popper in - perhaps in the References? Not that it is important.

(7) I am sending on your Nominations to the Academy; but I rather should prefer not to be too deeply involved with it.

Much love, and many thanks
Yours ever
Kurt
