Dear Mario,

Very many thanks for your letter of October 5th.

I am very <sup>happy</sup> glad that you are willing to ask Professor Sachs to let you see his MS. (You did not enclose a copy of your letter to him but then this is not at all necessary.)<sup>x</sup>

Alas, my "book on Relativity" is no further along than it was this time last year. There must have been some misunderstanding about something I wrote in my letter (perhaps I referred to my Amsterdam lecture, Epistemology Without a Knowing Subject). I have no time for my own work. I am completely bogged down in administrative work, and obligations which have nothing to do with my work.

Much love  
Karl.

Dear Mario,

I typed this letter on 20th century writing paper because of your remark that the (disappointing) Austrian pavillion (I quite believe you that it was disappointing!) was "last century". (Every century has its bad taste!)

Love

Hermie.

Our love to the family. I keep my fingers crossed and I hope that you are by now in possession of "a treasure" who helps during the day.

H.

<sup>x</sup> The copy has meanwhile arrived. Many thanks. I completely agree with the contents of this letter, of course. But I still think that Sachs's results are very impressive. Whether they are ~~so~~ soundly derived from his assumptions I cannot judge, but no doubt you will be able to do this.

Karl
