Dear Mario,

Many thanks for your letter of October 14th.

Because of several deadlines, I shall not be able to reply before the middle of November. Both Hennie and I are terribly sorry that you have to have yet another operation, but if it does give you relief, this is something.

We both greatly appreciate that you tried to come to England to visit us.

Your list of things you did not find in L.S.D. is interesting. But what you say about World 3 does not enter into my arguments. Nor do you take any notice of the fact (pointed out by me) that Bolzano and Frege anticipated me with world 3 — only that they did not (as I do) develop the idea that it is both man-made and to some extent independent of man.

I liked your furniture of the world — in part very much; but it is incomplete.

yours ever

Karl
